Direct Automation Seeks:
Business Analyst in Sioux Falls, SD

Direct Automation is a process automation integrator that supplies consulting, design, procurement, installation, and support of various automation platforms for industrial facilities. Direct Automation serves many clients in the Midwest and needs talented Automation Engineers to help complete successful DCS migrations.

This position will contribute to a fast paced and growing team responsible for the development, testing, and continued improvements of facilities utilizing various DCS platforms and PLC platforms.

The position will be an integral part of the engineering team on implementing projects and product development of data displays. The successful candidate will perform tasks independently while working closely with individual team members to insure that goals are met. The role requires expert data base and integration knowledge.

Position will be responsible for developing and implementing data base organization and display generation for clients.

Duties include but are not limited to the following:

- Soft skills of following up with clients to increase likelihood of future deals.
- Soft skills of ensuring customer satisfaction by probing for dissatisfaction in newly won deals.
- Communicating with process engineers and clients.
- Procurement of parts and subcontractors.
- Integrating cutting edge statistical analysis and alarm metrics for clients.
- Site start-up support of integrated data systems.
- Travel to conventions and start-ups as requested by management.
- Data base organization in a logical consistent manor in softwares like OSI Pi, Dataparc, SQL, Sharepoint, Tableau, Business BI, and Qlik.

Requirements Minimum of an education and/or work experience that constitutes a knowledge in Database organization and display generation. Automation and process control systems knowledge (DCS, PLC, SCADA, networking, etc.) is a plus. Requires excellent communication skills and writing abilities. Candidate should also be self-motivated and capable of working in a project team environment. Strong project management and leadership skills are desired.

Travel Requirements 10-30% regional travel required to support installation and start-up activities.

Benefits

We offer a team focused work environment with competitive salary, office facilities, performance based incentive pay, benefits including medical, dental, life insurance and 401(K) with matching contributions. We will invest in training as necessary.

To be considered for this position, please send resume, cover letter, and 3 references to the reply address or Carsonm@direct-automation.com
