Direct Automation Seeks:
Master Electrician in Sioux Falls, SD

Direct Automation is a process automation integrator that supplies consulting, design, procurement, installation, and support of various automation platforms for industrial facilities. Direct Automation serves many clients in the Midwest and needs talented Automation Engineers to help complete successful DCS migrations.

This position will contribute to a fast paced and growing team responsible for the development, testing, and continued improvements of facilities utilizing various DCS platforms and PLC platforms.

The position will be an integral part of the engineering team on implementing projects and working with subcontractors. The successful candidate will perform tasks independently while working closely with individual team members to insure that goals are met. The role requires expert electrical knowledge.

Position will be responsible for developing and implementing electrical tasks outlined in scopes that are communicated to us by clients.

Duties include but are not limited to the following:

- Industrial Electrical design and installation according to code.
- Writing of electrical portion of scopes that is accurate and consistent.
- Development of electrical parts lists is accurate for scope provided by clients.
- Interpreting scopes in proposals that meet customer needs.
- Designs and implements electrical portion of automation solutions for process controls.
- Soft skills of following up with clients to increase likelihood of future deals.
- Communicating with engineers and clients.
- Procurement of parts and electrical subcontractors.
- Site start-up support of integrated control systems.

Requirements Minimum of a license of a Master Electrician and the experience and knowledge expected of Master Electrician. Automation and process control systems knowledge (DCS, PLC, SCADA, networking, etc.). Requires excellent communication skills and writing abilities. Candidate should also be self-motivated and capable of working in a project team environment. Process experience, Emerson Delta V, Rockwell, Siemens PCS7 experience is a plus. Strong project management and leadership skills are desired.

Travel Requirements 20-40% regional travel required to support installation and start-up activities.

Benefits

We offer a team focused work environment with competitive salary, office facilities, performance based incentive pay, benefits including medical, dental, life insurance and 401(K) with matching contributions. We will invest in training as necessary.

To be considered for this position, please send resume, cover letter, and 3 references to the reply address or Carsonm@direct-automation.com
